*When programming a specific program to open with X-keys, use the Shortcuts tab.

Code Snippets

*Fancy Box Code	<code><a class="fancybox" rel="gallery1"</code>
**Fancy Box Script	<pre> <script type="text/javascript"> \$(document).ready(function() { \$(".fancybox").fancybox({ openEffect : 'none', closeEffect : 'none' }); }); </script></pre>
Canonical Tag	<code><link rel="canonical" href="http://xkeys.com/xkeys/xk24.php" /></code>
***Reference to a Specific Tag – URL	<code>?tpm=1_2</code>
***Reference to a Specific Tag – Anchor	<code>#tpm1_2</code>

*When adding a larger gallery onto your page, this is the first part of the code that I use.

**With adding a larger gallery onto the page, this is the script I use with it.

***When referencing a specific tab to open from a link or different page you have these two options, this goes at the end of the url. For example: http://xkeys.com/xkeys/xk24.php?tpm=1_2 The last number is identifying which tab number to open.
