

Installation instructions for X-keys XKE Series Tilt Stand

- 1) Remove the two upper rubber feet from back on XKE Series unit
- 2) Carefully remove parts from the retail bag
- 3) Orient the metal plate with bale brackets attached so the slots point to the outside of the case. Slide the included hex head screws into upper two tracks according to the hole pattern on the plate
- 4) Drop metal plate onto screws and center it on the back of the unit
- 5) Use the thumbnuts included to secure metal plate to the unit
- 6) Fit the open ends of the bale into the bale brackets

*These pictures show the 10x8 being installed. Follow the same procedure for the 16x8 version one less hex head screw and thumbnut.
